

Lab 10 - Box Model

Instructions

1. Answer the below question in the boxes if needed.
2. For coding exercises, code on your computer and zip all your code before submission.
3. Please submit the assignment through TalentLabs Learning System.
4. **NO INLINE CSS CAN BE USED FOR THIS LAB**

Part 1: Margin

Steps:

1. Go to VS Code and open the folder that we created in Lab 1
2. Create a new HTML file inside the folder name "box-model.html". You can use the HTML skeleton we included in Chapter 1.
3. Build HTML elements inside the body to replicate the screenshot below.

This is a Heading

This is a paragraph.

4. By using external CSS, style the HTML elements so that there is a 50 px margin below the heading element and an 80 px margin between the heading and paragraph element.

Part 2: Padding

1. In the same set of HTML/CSS files, set the background color of the paragraph to "lightblue".

This is a Heading

This is a paragraph.

2. Use the padding property to set the top and bottom paddings for <p> to "25px", and left and right paddings to "50px".

Part 3: Width / Height

1. In the same set of HTML/CSS files, set width of heading to 40%, but set min-width to 300px.
2. Zip the HTML and CSS file and upload it to the Learning Management System
