

## Lab 12 - Bootstrap

### Instructions

1. Answer the below question in the boxes if needed.
2. For coding exercises, code on your computer and zip all your code before submission.
3. Please submit the assignment through TalentLabs Learning System.
4. **NO INLINE CSS CAN BE USED FOR THIS LAB**

### Part 1: Adding Bootstrap

Steps:

1. Go to VS Code and open the folder that we created in Lab 1
2. Create a new HTML file inside the folder name "bootstrap.html". You can use the HTML skeleton we included in Chapter 1.
3. Build HTML elements inside the body to replicate the screenshot below.

This is a paragraph.

This is a paragraph.

4. Add bootstrap using CDN in the <head> section as shown in Chapter 12.
5. Replicate the screenshot below using bootstrap background and text classes.

This is a paragraph.

This is a paragraph.

## Part 2: Bootstrap Images and Buttons

1. Add an image inside the HTML document and format it like the one below (i.e. oval shape).

2. Add a button to the HTML document and format it like the one below.

Primary

## Part 3: Bootstrap Grid

1. Create a grid system inside the HTML document
2. Use appropriate Bootstrap classes to add 3 columns to the HTML page. The columns should occupy 25%/50%/25% space respectively. Style it in the same way as the one below.

3. Add necessary adjustments so the columns stack on top of each other when the screen size is less than md size.

## Part 4: Self Learning

1. Read the documentation of bootstrap from the documentation page provided in Chapter 12.
2. Replicate the image below by centering both the image and button as shown in the screenshot. Read the docs on how to center elements such as images/buttons.

Primary

3. Zip the file and upload it to the learning management system.
